Community Classroom Project

Our project: To renovate our existing large storage room into a multi-purpose classroom facility. **Estimated costs: \$31,500.**

Our plan: To increase the district's educational and technical offerings on natural resource topics for youth and adult.

Our goal: To expand conservation outreach in Charlevoix County, and create a space where the district and its partners can meet, collaborate and provide more opportunities, both educational and service-related, to area residents and visitors.

Promoting natural resource conservation in Charlevoix county through partnerships, community outreach and landowner support.
